

Free Digital Media Seminar

Monday, April 25th GCC Campus Think inside the box.

A free seminar on Apple's Final Cut Studio for today's Educators.

You are invited to attend the Apple Final Cut Studio seminar. Whether you're a long time Final Cut Pro user or just getting started, this information packed seminar is a must attend event.

Why not keep all your production tools in one box? Final Cut Studio combines the industry-standard Final Cut Pro 5 — including powerful SD, DV and HD editing capability — with the real-time design engine of Motion 2 for stunning motion graphics, the flexible audio creation and control tools of Soundtrack Pro and the sophisticated SD and HD DVD authoring features of DVD Studio Pro 4.

At this seminar you'll learn:

- All about the latest products from NAB & OS X Tiger Update
- Why Mac OS X is the best OS platform for rich media content creation, delivery and consumption
- Maximize the capabilities of the Final Cut Studio while keeping costs low with Apple Software licensing
- What's available from Apple for support and training

About the seminar leader:

Vin Capone, a leading expert in digital video development is delivering this seminar. Vin has worked with Hollywood and the television industry to foster the adoption of Apple's products and technology. He has worked on the sets of major motion pictures, television shows and independent films. Most recently, Vin has worked with key higher education and K-12 institutions to help them further integrate media into their curriculum as well as their day to day business needs of communicating with their customer base.
